Case 03 · Spec on one page: Removal Sample Audit

A summary of the full specification.

Promise

For each district, the share of wrong deletions with a 95% interval, a public seed and a reproduction pack. Districts above the threshold get a full re-check.

Ten features

#	Feature	Layer
1	Freeze the deletion list	Draw
2	Public draw	Draw
3	Stratified sampler	Draw
4	Offline field app	Field
5	Revisit protocol	Field
6	Checker assignment	Field
7	Corrected estimate	Estimate
8	Booth flags	Estimate
9	District report and threshold	Report
10	Reproduction pack	Report

Key decisions

1,500 visits per district; public seed; three visits before "unknown"; threshold on the lower bound; an independent checker pool.

What stays open

Who knocks on the door. Without an independent checker, a narrow interval can sit in the wrong place.
